BeltTag™

Securing the BeltTag™

IMPORTANT: Check and remove the thin protective film from the silicone liner on the inside face of the belt prior to use. This will ensure that the silicone will grab the surface of the container when the tag is applied.

- 1** Place the BeltTag™ over the top of the can.

- 2** Position the BeltTag™ on the can centrally between the top and bottom.

- 3** Pull the excess belt through the ratchet to secure.

Releasing the BeltTag™

- 1** Place the BeltTag™ lock on the detacher.

- 2** Pull the belt back through the ratchet whilst placed on the detacher.

- 3** The BeltTag™ can now be removed from the tin.
