📖 User Guide

⟦⟧ MEGA*LOC*™ Eyewear Tag™

CE ⌫

⚙ Applying the Eyewear Tag™

1 Position the eyewear to be protected on a flat surface along with the open Eyewear Tag™.

2 Slide the Eyewear Tag™ onto the end of an arm on the eyewear.
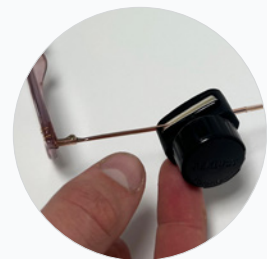

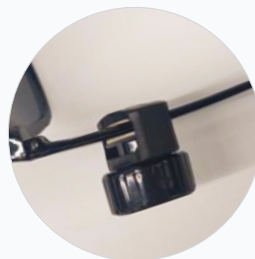

3 Slide the tag as far up the arm as possible.

4 Twist clockwise until there is a 'click' sound and the tag will not tighten further – it is now secured.

NOTE: The Eyewear Tag™ has been fitted with a safety mechanism that prevents over tightening.

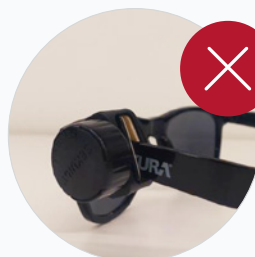

IMPORTANT NOTE WHEN APPLYING THE TAG:

If the tag is fitted at an **diagnonal** angle as shown, the glasses frame will automatically be centred on the plunger. Additionally, the full length of the gripping pad is applying pressure to the frame giving a very secure tag.

Example on wire armed glasses

Keep the tag **centred** on the frame of the glasses to ensure the tag is fully secure.

🔧 Releasing the Eyewear Tag™

1 To release, place the Eyewear Tag™ onto a detacher.

2 Then, while holding the eyewear steady, twist the Eyewear Tag™ anti-clockwise until there is a 'click' and the tag is released. Remove the tag.
